

MEASURE UP THE ARTWORK

PROJECT: #25100

Difficulty Rating:

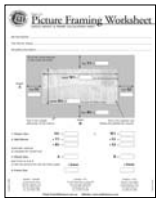

What you will need:

- 1 x Mat Master™ Rule/Guide
- 1 x 2H Pencil
- 1 x FrameCo Worksheet
- 1 x Artwork

#14209 Mat Master™ Rule

FrameCo Worksheet

Accurately measuring your artwork is essential to achieve a professional result. If this process is not done correctly then errors will occur. We recommend you use a FrameCo Worksheet designed to accurately record all dimensions.

When using the Picture Framing worksheet record all the measurements and materials used. This can then be filed for later use.

The worksheet includes sections for Job Description, Mat and Moulding details, and a diagram for measuring a picture with mat borders. The diagram shows a picture with dimensions H1 and W1, and mat borders of T1, S1, S2, and B1. Below the diagram are calculation boxes for the total mat size (A and B) and the final frame size (including a 3mm allowance).

Download worksheet - www.clubframeco.com > Price Lists > Forms

Complete the boxes as follows

1. Job Description - Describe the picture to be framed.
2. Top mat #1 - Record the colour of the top mat being used.
3. Bottom Mat #2 - Record the colour of the bottom mat being used.
4. Moulding Description - Describe the moulding selected for the job.
5. When measuring the art work we need to determine the image size that will be seen once the picture is matted. To do this you must subtract 5mm from both height & width to allow the mat to overlap the edges of the image. Place these measurements in the text boxes on the shaded image.
6. Calculate the size required for the mat borders, as a general rule we suggest 60/70mm and note these sizes in boxes S1, S2, T1 & B1.
7. Transfer these measurements into the corresponding boxes on the lower half of the Worksheet, add up the 2 columns and place the results in Boxes A & B. This is the size you will cut the outside of the mat board.
8. Add 3mm to A & B and place the total in the remaining boxes, 3mm is added to allow the mat sandwich to fit into the frame easily. This will be the size of your frame.
