

USE ACID FREE DOUBLE SIDED TAPE

PROJECT: #25260

Difficulty Rating:

#17035 Double Sided Tape 12mm x 33m

This general-purpose tape is perfect for many tasks in picture framing. It is ideal for adhering mat boards together when cutting double, triple or creative mats, positioning delicate artwork and many other paper craft projects.

Being an ultra-thin tape it is easy to use, folds around corners and bevels neatly, and makes many of those awkward framing jobs a lot easier. Every picture framer, photographer, artist and paper craft enthusiast needs a roll or two of this indispensable tape on hand.

Using acid free double-sided tape:

Mounting...small photos, some paper borne artwork.

This alternative mounting method of artwork can sometimes be used. However our preferred method is to use acid free hinging tape.

1. After cutting out the window, apply the double-sided tape to the back of the mat board along and close to the top edge of the window. Fig. 1
2. Remove the protective film from the tape then carefully align the mat over the art work....evenly press the mat board into place. Fig. 2

Fig 1.

Fig 2.

Positioning of artwork..eg Needlework, Rice Paper, Silk etc

This tape being acid free makes it the perfect choice when lightweight artwork needs to be mounted directly onto mat board. No matter how delicate the work is the tape will not bleed through and damage the work. Fig. 3

Fig 3.

Wrapped Bevel Mounts.

Again this tape is ideal when wrapping a deep cut bevel with paper or fabric. The tape is easy to handle and being ultra thin it wraps around the sharp bevel angles perfectly. When covering a deep cut bevel mat, use the tape the full length of the windows bevels as this will ensure that the paper/fabric is adhered to the bevel over it's entire length. Fig. 4

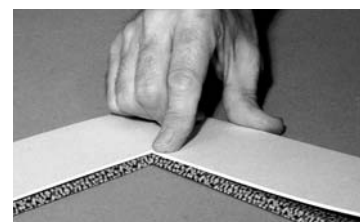

Fig 4.

Mounting Freehand cut shapes to mats.

Decorating a mat by mounting freehand cut shapes or stamped artwork onto the mat is another great use for this versatile tape. It's dry, double sided, acid free and is freely used in the rubber stamp art and scrap booking crafts. Fig. 5
